OBJECTIVE I am 21 years old with a new family. In today's world it is very hard to provide for a new family with the way the economy is going, but I want to do what ever it takes to provide for my family. In my short time working in the oilfield I have realized that I want to stay in the profession for as long as it allows me to. I like to learn new things and be challenged. I get bored doing the same things day in and day out. I'm a hard worker and I like to do things right the first time and not have to go back and fix things that should have been done right the first time. I want to better myself with more knowledge and experience about the oil field so that I can work myself up in a company and hope to retire in the future with that company.
