

## On Target Performance Management System

---

**Job Title:** Water Management Coordinator (Gas)      **Reports To:** Production Manager  
Utica Operations

**Alt. Title(s):**      **Department:** Ohio/Utica Gas Operations

**Salary Range:**      **Reference Code:** C50340765-1

---

### Position Summary

This position will initially be located in Waynesburg, PA. It will eventually be relocated to an Ohio office.

This is a field-based position which will be responsible for all operational aspects regarding the Ohio/Utica Gas Operations water logistics and management thereof. Excellent judgment and problem solving skills will be necessary to efficiently conduct the required job responsibilities detailed below. Areas of concentration will include installation of all water transfer systems, related pipeline, pump transfer stations, and reservoirs. Individual must be driven and have excellent follow-up skills in order to work independently. Must be an efficient planner and organizer to complete assignments and large scale projects in a timely manner. Must possess excellent written and verbal communication skills in order to excel at managing multiple contract crews and communicate effectively with management, vendors, and consultants.

---

### Target Responsibilities

Individual must adhere to the 5 core values of Consol Energy in their daily job duties: 1)Safety 2)Compliance 3)Continuous Improvement 4)Production 5)Cost

Will assist with water system installations and upgrade projects within the Ohio/Utica Gas Operations.

Assist with the strategic development of water sourcing to support Ohio/Utica fracing operations.

Will directly interface with the Water Systems and Operations group.

Will assist with the design, installation, and operation of the water transfer and pumping facilities.

Will create, review, and update water system mapping.

Conduct safety inspections and ensure that equipment is used in a safe and responsible manner.

Work safely at all times surrounded by unpredictable field conditions, continuously moving equipment, and adverse weather conditions.

Coordinate and direct the disposal of any non-recycled water (slop or SOG water).

Coordinate with the Drilling & Completions department to ensure frac water supply and availability.

Coordinate, schedule, troubleshoot, and supervise the daily water pipeline installation and repair operations.

Supervise and coordinate water hauling activities and monitor transport efficiency.

Oversee acquisition of materials and cost control for construction of pipeline and pump transfer stations.

Assure that all services and materials have assigned requisitions and purchase order numbers.

Routinely review and evaluate contractor charges based on the approved rate sheet for the company.

Cooperate with Midstream group to provide engineering management on capital asset projects and create capital budgets.

Conduct safety meetings.

Manage project materials and design aspects in a cost effective manner.

---

### Minimum Requirements

Must be a highly safety minded individual.  
B.S. in Mechanical or Civil engineering is preferred.
