Work History

Jan 1992- June 2008
Pumper/ Production Supervisor
57244 Claysville Rd.
Cumberland, Ohio 43732

Experience

I have 19 years experience in oil and gas production, casing wells, jet starter, pumping wells and rabbit wells. I know how to change out any type of plumbing. (EX) motor valve, logic boxes, 3pt, catalac heaters. I know how to unload the well and get the rabbit to run. I can set the right time cycle for the well so it doesn't load up on me. I'm good at reading charts and discovering leaks in sales line or flow line I know how to set timer to kick on and off by when the well pumps on and off. I know how to isolate and shut in parts of sales line to determine where there may be a leak in the line. I know how to determine if the casing has a hole in it by loading up the well and being able to unload it. I have pumped wells ranging from shallow wells to deep wells. I have worked with new rose rn wells with 5000 lbs of pressure on the casing. I know how to use a line locator, gas detector & echoscreen.

Education

Aug. 1979- May 1992

John Glenn High School

New Concord Ohio 43762

I recieved my high school diploma and I went to school for Solvent Treatment.
